

*Special High School Students (Dual Credit) are included in these totals

The preceding graph shows that WVSU has had a full-time enrollment decline of approximately 325 students (10%) from fall 2007 to fall 2011. At the same time, the part-time student enrollment increased by 23 students (3%). These figures suggest that although WVSU has had significant decreases in full-time enrollment over the past five years, our part-time enrollment has experienced relatively flat to a slight increase in growth.
